KESHAN KULASEKARA

Associate Software Engineer

kulasekarakeshan41@gmail.com | 0765858504 | keshankulasekara.com

SUMMARY

Motivated and detail oriented Software Engineering graduate with hands on experience in full-stack web development, software engineering, and machine learning. Proficient in developing responsive web applications using React.js, Node.js, Python, and MongoDB, with practical experience in REST APIs, cloud deployment, and version control. Strong problem solving, analytical, and teamwork skills, with a passion for building efficient, scalable, and user friendly software solutions.

WORK EXPERIENCE

Internship, Codeolima (Pvt) Ltd. **Jun 2024 - Sep 2025**

- Developed and maintained web applications using React.js, Angular, Node.js, and Python.
- Assisted in backend development, REST API integration, and database management using MongoDB and PostgreSQL.
- Gained hands on experience in debugging, version control with Git, and cloud deployment using AWS EC2 and Docker.

PROJECTS

Smart Learning Project.

- Developed an intelligent learning platform using React.js,Node.js, Python / Flask and machine learning, implementing emotion aware lecture playback, automatic quiz generation, note summarization, weak concept prediction and learner progress tracking.
- Trained and evaluated an emotion recognition model using the FER-2013 dataset, achieving 78.07% test accuracy, and implemented multilingual support to provide a more personalized learning experience.

Chamber Skill Web Application.

- Developed a full-stack web application with modern frontend and backend technologies.

Presonal Portpolio.

- Developed a web application with modern frontend technologies.

Fine Managment Project.

- Developed a Mobile application with modern frontend and backend technologies.
- Issuing fine and paying the fine using the mobile application.

EDUCATION

Bachelor of Software Engineering **Jan 2022 - May 2026**

University of Westminster
Final Class : Second Upper.

Diploma in IT (ESOFT) **Jan 2020- Jan 2021**

KEY SKILLS

React.js, Node.js, Python, MongoDB, SQL, GitHub, Machine Learning, Docker, AWS
